## ECSA ICT UNIVERSITY HACKATHON BRIEFING SESSION THE TECHNICAL ASPECTS

By: Xolisa Nontshe

ECSA  
ENGINEERING COUNCIL OF SOUTH AFRICA

# Topics

**01** Introduction

**02** Team Composition

**03** System Designs &  
Structure

**04** Software Tools

**05** Website  
Development

**06** Knowledge  
Management

# Introduction

The Engineering Council of South Africa (ECSA) is a statutory body established in terms of the Engineering Profession Act, 2000 (Act No. 46 of 2000).

The ECSA ICT University Hackathon is the first of planned hackathons where participants are expected to create a website and Knowledge Management solution addressing an assigned theme.

ECSA wants to ensure that it has all the required and feasible digital platforms that enable anywhere and anytime access to information and its services by all its stakeholders.

CONCEPTUAL DATA  
MODELING

## Tools & Platforms Used

Bootstrap

Visual Studio Code

## Programming Languages Used

HTML5 | CSS3 | PHP | C# | JavaScript | Python | XML | SQL | JSON | Angular

ECSA website should be cutting-edge and must resemble the organisations corporate Identity

- Programming Languages
- Design Layout
- Use Cases
- Search Engine Optimization

- Web Hosting
- Security (SSL – Security Socket Layer Certificates)
- Analytics
- Website Maintenance

# Knowledge Management

Knowledge Management (KM) system is a system that can make use of tools such as the Microsoft SharePoint libraries

- Store and share files (internal documents, images, and videos related to organisational activities)
- Share organisational updates.
- Share relevant published material.
- Connect employees.
- Collaborate with external stakeholders.
- Increase productivity by accessing organisational knowledge (stored by different divisions) in one integrated system.
